Why you should consider Wet Washing Air Filters With HVFS

The Cost of Having a Filter Washed and Tested as a Rule is About 1/3rd of the Cost of a New Filter.

Each Filter May be Washed up to a Maximum of 6 Times with no ill Effect. At HVFS Wet Testing is Carried Out Each and Every Time.

For Example, Say a New Filter Had a Cost Price of \$60.00 and the Cost to Wash it was \$20.00.

Your Expenditure on 7 New Filters would be \$420.00.

Compare this to Buying 1 New Filter for \$60.00 and having it Washed 6 Times at \$20.00 Per Wash.

Your Total Expenditure Would Then be \$180.00,

Or a Saving of \$240.00, That Is a Massive 57%.
